Attachments: DS1-objectives and endpointsv2_LL.docx;

My comments on Chris' work. I am also researching cough and throat irritation scores; will send along what I find later today.

Minoj and Chris' comments really sharpened the focus and improved the scientific merit. They should get a shout out at the next corporate wide meeting!

Michaela- I should have a window of time free this afternoon. Will call so we can discuss any final issues on the synopsis. Whenever you have the next draft-- send it along.
