Subject: [US Vape Policy] Flavors memo
Attachments: Letter to FDA-Gottlieb 171120.docx

Hi folks

As agreed at the discussion on 25 Oct, attached is a DRAFT memo on flavors that I hope we can use to use push back on some of the simplistic thinking in this area.

In confidence: in terms of who it comes from, I have had a preliminary discussion with Iowa AG Tom Miller. He is interested in principle and may be able to mobilise some public health people, if I can negotiate a final text with them.

Any thoughts on the text - and especially any errors or missed points - please let me know. Also, views on how to use this. The reasons for writing before the ANPRM rather than after are:

- to give Gottlieb something to use for internal challenge
- possibly secure some last minute changes in ANPRM
- provide a document on ANPRM launch day that provides counter to anti-flavors PR
- help inform comments to ANPRM - though may need recasting
- provide advocates with talking points from as early as possible
- to use in ongoing row with Dems in Congress
- much the same thing can be submitted as a comment

Once we get this nailed down, my intention is to produce a shorter version for advocates etc.

Best regards...

Clive
