MINI-MENTAL STATE EXAMINATION

A. ORIENTATION

Ask, "What is today's date?" (Then ask specifically for parts omitted, eg., "Can you also tell me what season it is?")
Ask, "Can you tell me the name of this clinic (hospital)?" "What floor are we on?" "What city (town) are we in?" "What country are we in?" (10 points) (Answer must be precisely correct)

B. REGISTRATION

Ask the subject if you may test his memory. Then say, "ball," "tree" and "flag" clearly and slowly, about one second for each. After you have said all 3, ask him to repeat them. This first repetition determines his score (0-3 points) but keep saying them until he can repeat all 3. If after 6 trials, he does not learn all 3, recall can't be meaningfully tested.

C. ATTENTION & CALCULATION

Ask the patient to subtract 7 from 100 and keep subtracting from each figure obtained. Do not re-check with each subtraction. Count each correct subtraction. Then test the ability to spell "world" backwards and score the number of letters in correct order (score is the highest of the two tests) (5 points)

D. RECALL

Ask the subject to recall the three words you previously asked him to remember. (Score 0-3 points) Do not provide clues.

E. LANGUAGE

Name a pencil, and watch (2 points)
Repeat the following: "No ifs, ands or buts." (1 point)
Follow a 3-stage command: "Take a paper in your right hand, fold it in half, and put it on the floor" (3 points)
Read and obey the following: CLOSE YOUR EYES. (1 point)
Write a complete sentence (1 point) (Do not dictate sentence)

F. CONSTRUCTION

Copy design (1 point). The design has two five-sided figures that have one set of overlapping angles.
